EXPERIENCE

- **BNY — Software Engineering Intern - NetX Wealth and Wove Mobile Team June 2026 – Aug 2026**
 - Identified that the team had no automated way to verify core app flows before every new feature or bug fix went out, and independently designed and built an AI-driven end-to-end testing platform from scratch, selecting Maestro as the mobile UI test runner for the Ionic/Capacitor hybrid app and integrating an AI agent (Cascade/Eliza) to auto-generate and maintain test scripts, removing the need to hand-write YAML.
 - Designed an IDE-integrated workflow using slash commands that unified multiple automation paths into one system – capturing UI hierarchies/screenshots to auto-generate navigation maps, analyzing git commit diffs to write and run regression tests, and pulling Jira tickets to generate corresponding tests and push back results – turning a fully manual process into one orchestrated pipeline.
 - Engineered an MITM proxy-based testing capability to intercept and override live API responses, enabling automated validation of app behavior under modified conditions such as forced update alerts and edge-case network scenarios.
 - Led the Capacitor version upgrade (v7 to v8) across the entire Wove Mobile app, including migrating all 8 custom native plugins for compatibility, and researched Fastlane to explore deployment automation, documenting findings and platform architecture in Confluence.

EDUCATION

- **Indira Gandhi Delhi Technical University for Women** 2023 – Present
Bachelor of Technology - Computer Science and Engineering CGPA: 9.55
- **Heeralal Public School, Delhi** 2023
Senior Secondary (CBSE) — PCM Percentage: 91.6%
- **St. Kabir School, Hisar** 2021
Secondary (ICSE) Percentage: 99.4%

SKILLS

- **Programming Languages:** C++, C, HTML, CSS, JavaScript
- **Frameworks/Libraries:** Node.js, Express, Streamlit, Flask, NumPy, Firebase
- **Tools/Platforms:** Maestro, mitmproxy, Jira API, Fastlane, Gitlab, GitHub, VS Code
- **Core Competencies:** Object-Oriented Programming, Data Structures & Algorithms (300 LeetCode problems), REST APIs, AI Agent Integration

PROJECTS

- **SportsBuddy — Sports Networking Web App** 2025
Tech Stack: HTML, CSS, JavaScript, Firebase, Neo4j (Cypher)
 - **Community Platform:** Developed a **responsive web app** to help users discover, organize, and join local sporting events, with secure authentication and real-time updates via **Firebase**.
 - **Graph-Based Connections:** Designed and queried relationship models using **Neo4j** and **Cypher** to effectively map user connections and event interactions.
- **MediQuerie — AI-Powered Medical Guidance** 2023
Tech Stack: Python, Streamlit, Google Gemini LLM
 - **Interactive Health Tool:** Developed a **Streamlit interface** enabling users to upload medical images and enter text-based prompts for clinical insight generation.
 - **LLM Integration:** Integrated the **Google Gemini LLM** to provide AI-driven health suggestions from combined image and text analysis, including preliminary interpretation of visual conditions like skin rashes.
- **GreenGrowth — Crop Recommendation System** 2024
Tech Stack: Python, Flask, HTML, CSS, JavaScript
 - **Frontend Development:** Designed a responsive and intuitive interface for inputting environmental data like soil nutrients, temperature, and rainfall.
 - **Model Accuracy:** Used a **Random Forest Classifier** with **Label Encoding** and **PCA**, achieving **93% accuracy**, while collaborating with the team on ML and backend Flask integration.

ACHIEVEMENTS & CERTIFICATIONS

- **NXP Women in Tech (WIT) Program:** Top 75 of 15,000+ applicants for a year-long mentorship in VLSI and semiconductor design (2024 – 2025).
- **SheFi Scholars Program:** Full scholarship for a global fintech leadership program powered by Celo, focused on advancing women in Web3 (2024).
- **Generative AI Prompt Engineering Intern:** 6-week internship with IGDTUW and Sansoftech Services in prompt engineering techniques (Jul – Aug 2024).
- **Google Cloud Certified:** Foundational certification in GCP – cloud computing, networking, ML, and AI – through GDSC IGDTUW (2023).

ROLES AND RESPONSIBILITIES

- **Core Team Member — GeeksforGeeks IGDTUW:** Organized 3+ technical workshops/coding events, mentored juniors on DSA problem-solving, and facilitated industry speaker sessions.
- **EM Member — Taarangana (Cultural Fest, IGDTUW):** Handled 2 major events and anchored one during the annual college fest.
